VIDEO FILTERS

INSTALLATION GUIDE

BY: GRACEFKIM

Thank you SO much for purchasing the *Travel Essentials (6) Pack Video Filters*! I have spent a LOT of time perfecting these video filters from all the years I've been traveling and I am so excited to FINALLY share them with you.

All filters have been thoroughly tested on footage shot in HDR and 4K 30fps + 60fps, but will have the best results when shot in **4K 60fps.** They are designed for mobile footage as I have tested these filters in different lighting situations.
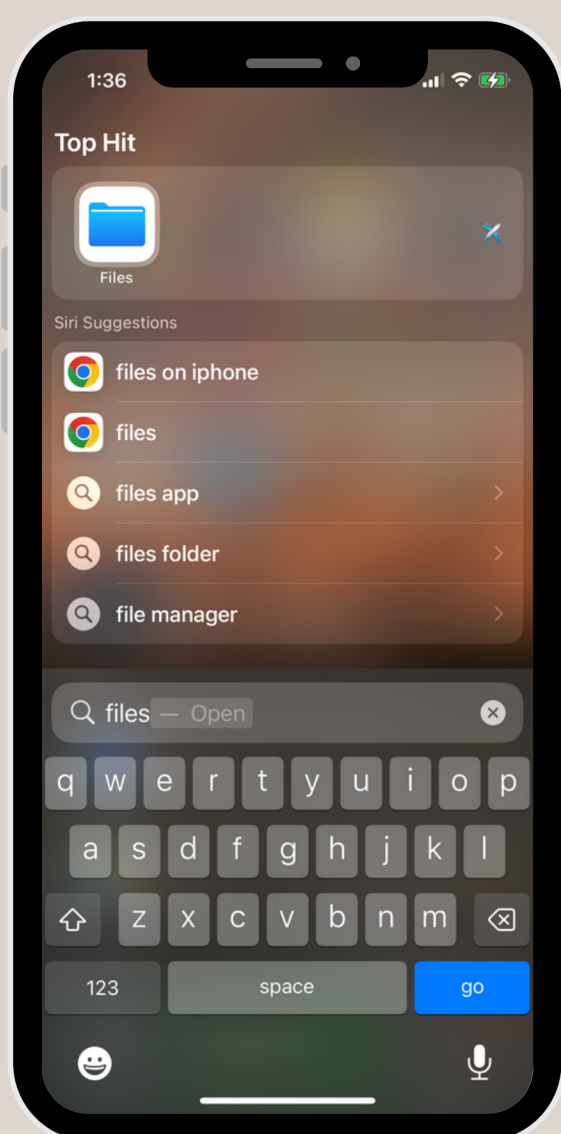

Note: *Since every video is shot differently, you may need to adjust a few settings to achieve your final, desired look.*

This **Installation Guide** will show you how to install the video filters onto the **Adobe Lightroom App.** Please note that these filters also work when downloaded onto *Adobe Lightroom Classic Desktop.*

*Make sure that the **Adobe Lightroom App** + the **Apple Files App** are downloaded on your phone.
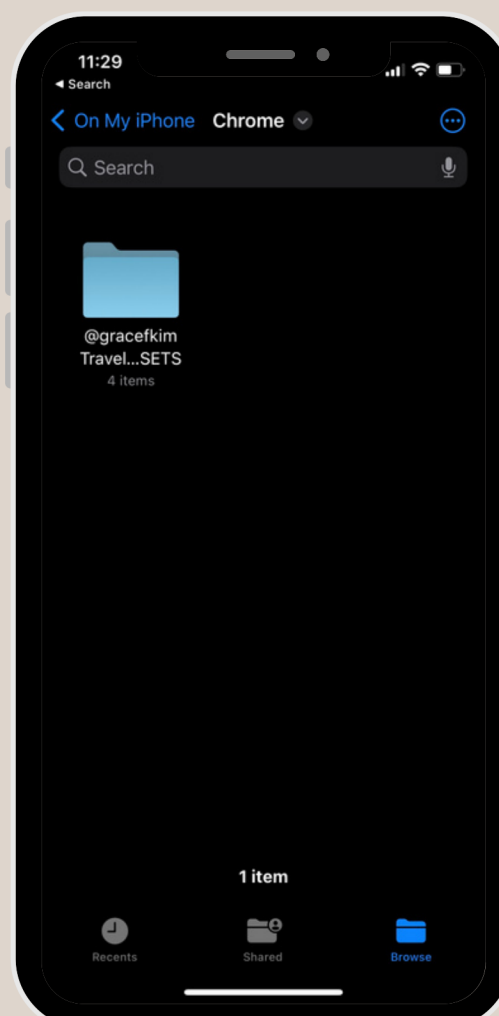

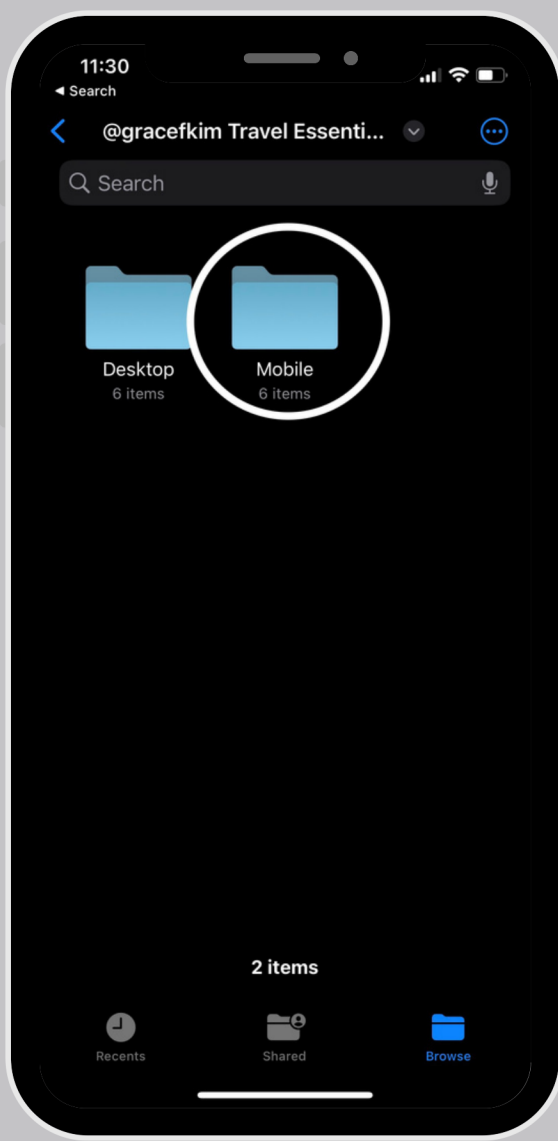

step one

Once the link is downloaded from your email, open up the **Files app.**

step two

Once opened, select folder titled **@gracefkim Travel Essentials PRESETS**
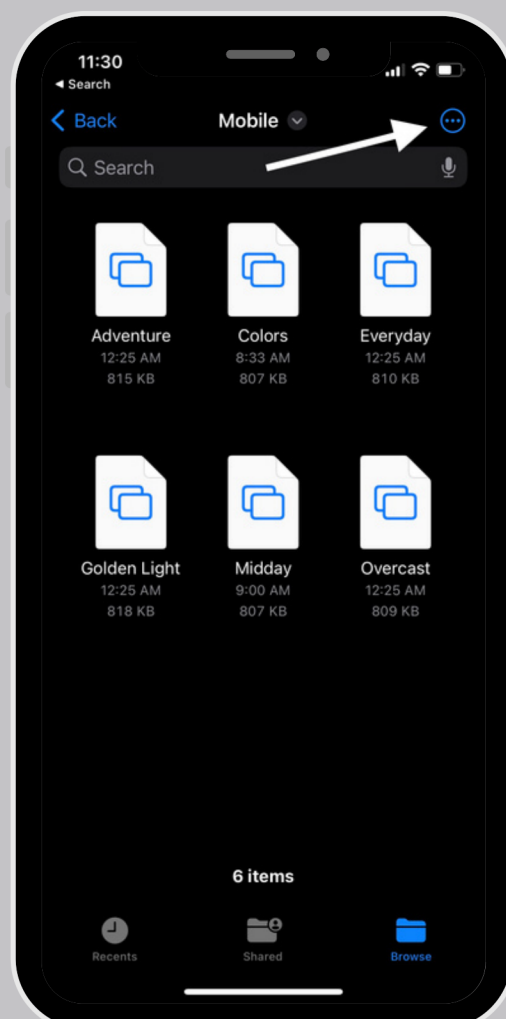

step three

Open up the **Mobile** folder. You should see **6 DNG files** (white background + 2 blue rectangles shown in next screen shot)
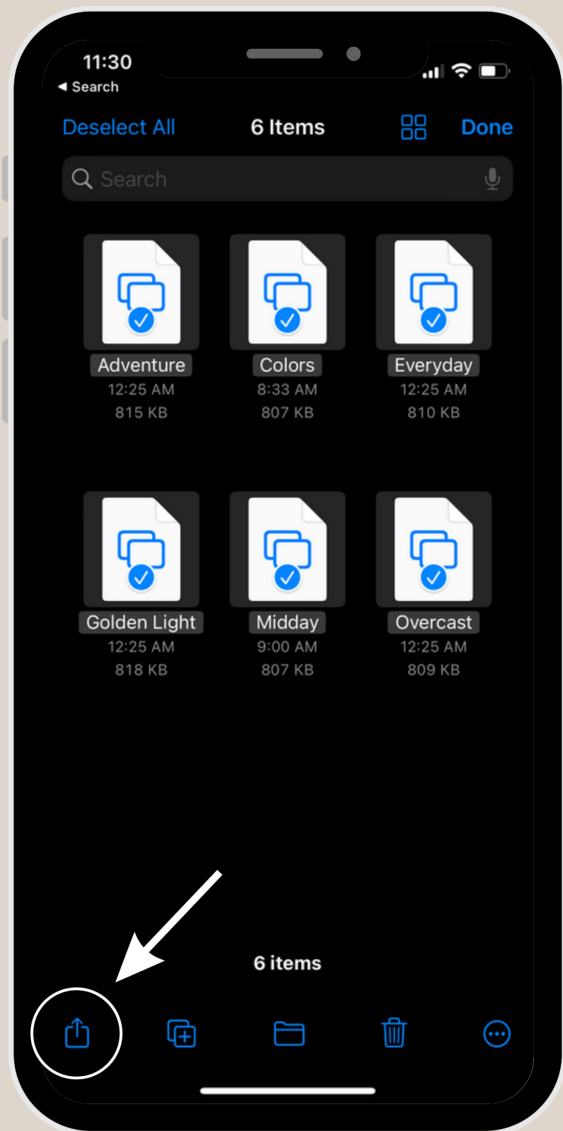

Note: if you can't find the folder, open up the search bar in your phone and search for "@gracefkim Travel Essentials Presets*"

step four

Click on the **3 blue dots** in the top right, and then click on **Select**

step five

Select all **6 Presets**, and then click on the little blue box in the **bottom left corner**.
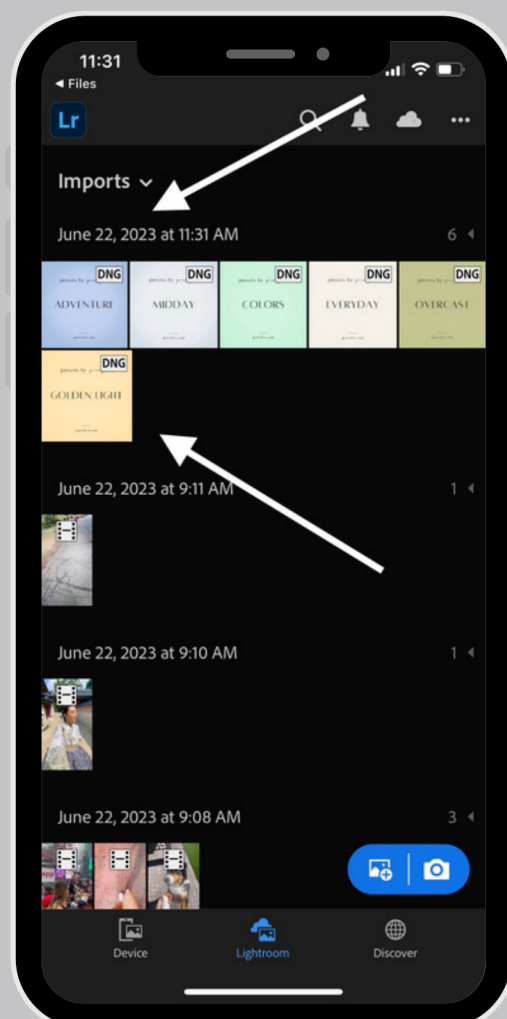

step six

Click on the

Lightroom app
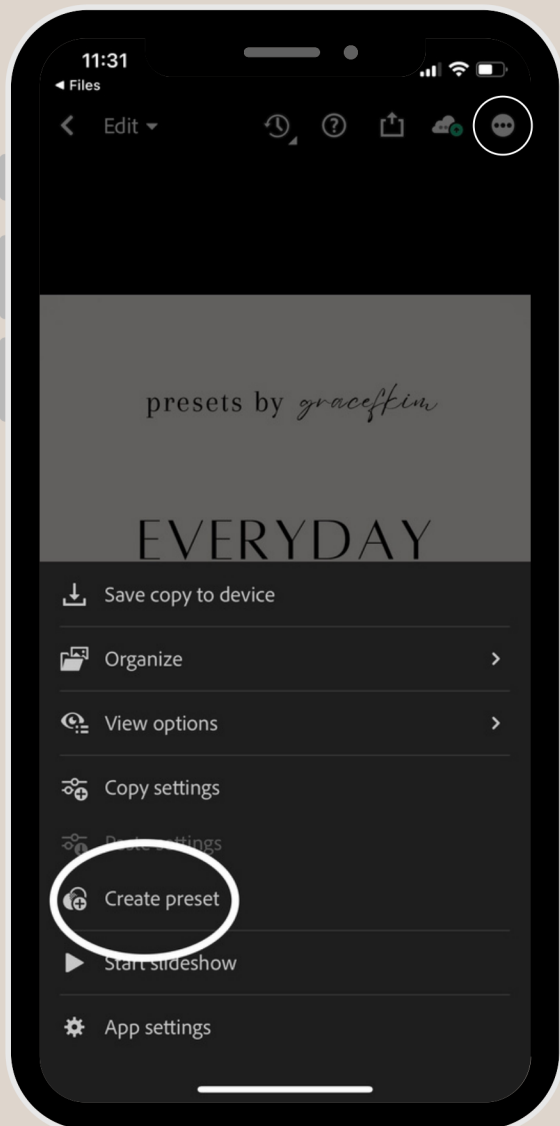

step seven

Click **Launch Lightroom Now**

step eight

Your Presets will automatically import into Lightroom. You can find them under **Imports**

step nine

Open up a **Preset**, click on the **3 dots** in the **top right corner**, and then select **Create preset.**

**Note:** you will have to do this one by one

step ten

Click **Create preset** and give it a name (i.e. *Everyday*)

Then, select **User Presets** nested under **Preset group**

step eleven

On the same screen, open up Preset group and click on **Create new preset group**.

step twelve

Label the preset group **@gracefkim Travel Essentials** and save all 6 Video Filters under this group.

Finish by clicking the ✓ button on the top right to save the preset group.

step thirteen

You will then see a pop up stating that your "**Everyday**" **Preset** was added to your **Preset group.**

Then, find your saved **Video Filters** under **Presets** (two overlapping circles) in the toolbar.

step fourteen

Finally, you will find the 6 Video Filters nested under **Preset group (@gracefkim Travel Essentials)** that are now accessible to use at any time!

Hope this Installation Guide was easy to follow!
